Gentlemen,

In accordance with Article 3, Section 7 and Article 8, Section 6 of the current National Master Freight Agreement, the Company is respectfully requesting a hearing before the National Utility Employee Review Committee to obtain authority for a change of operations. We are requesting to hear this change on June 19, 2014 in conjunction with the Southern Multi-State Grievance Committee Hearings at the Hilton Hotel in Houston, TX.

The purpose of the proposed change of operations is to improve our service by realigning our operation in the terminals designated in the change with the addition of UE employees, HVXP operations and road modifications. The proposed change of operations is essential to increase our market share in current three to five day service lanes.

The proposed change of operations modifies our operations in the Central, Southern and Western Regions. This change will provide transfer opportunity for all affected employees at the identified terminals contained within this change.

The Company is in the process of meeting with the Local Unions involved in this change and will answer any questions or concerns they may have regarding the change.

If you should have any questions regarding this proposed change, please do not hesitate to contact me at any time.

Sincerely,

David Evans, Vice President
Industrial Relations

OPENING STATEMENT

With the negotiation of Article 3, Section 7 the parties recognized and agreed to create a manner for the Unionized segment of the industry to compete effectively with Non-Union trucking companies. Through a series of change of operations ABF has begun to penetrate markets that we previously were unable to be effective in. We continue to evaluate our operating network to optimize our ability to increase our market share by improving our service.

We have expanded our two and three day service footprint over the past 10 years, which has helped penetrate this market. We are continuing our operational and marketing efforts in this segment of the business to increase our market share. The penetration of this business segment, along with our diverse service options and sacrifices of our employees has allowed us to survive a recession that crippled the economy of the United States and much of the world.

Our sales and marketing research has identified the opportunity for increased market share by improving the service in our three to five days lanes. We have identified segments of this business that we have great room for improvement and growth. This instant change of operations represents our operational plan to better compete and grow this business segment. The operational plan involved has the potential to reduce transit times up to 3 days in 2,249 lanes of traffic that we participate in.

With this proposed change of operations, we will be able to provide service that is equal to or better than our competition, which combined with our value-added services and benefits will continue to distinguish us in the industry. Many of our customers find our safety record, cargo claims ratio, informational technology and professional work force to be compelling reasons to choose ABF as their carrier of choice. By providing service that meets or exceeds their expectations in this three to five day market we believe we will increase our business levels with our existing and new customers.

We have experienced many challenges to growth over the last five years, but we have adjusted to survive. Now we need to take the necessary steps to grow our Company. We believe that our operational plan, once implemented, will ensure that we have a superior product to offer our current and prospective customers.

GENERAL CURRENT OPERATION

The Company has Distribution Centers located throughout the continental United States in our major market areas and supports these DC's with road and Utility Employee operations. In addition we have established High Velocity Exchange Points (HVXP) throughout all regions of the country.

Our current HVXP operation has 23 locations in all four regions of the country. The HVXP locations handle next day through four day service generally. Movement from the end of the line terminals to the HVXP is generally accomplished by UE employees, and movement between HVXP locations is generally handled by our road operation. In addition Utility Employees run meet and turns with road drivers or turn runs to our DC's and HVXP operations.

The physical location of both our DC's and HVXP's are based upon market demands and facility availability, the purpose of both is to transfer freight quickly and efficiently. We have moved several HVXP locations over the years to resolve facility issues as well as centralize their locations enabling more terminals and employees to benefit from the market. We continue to analyze these operations so we can make improvements in our service and further openings, closings and moving of these HVXP's will continue as market and operation needs dictate.

We also operate end of the line terminals in the major markets throughout the country. These operations are primarily tasked with pickup and delivery, but many participate in our HVXP operation.

GENERAL PROPOSED OPERATION

This change of operations will allow us to use segments of our HVXP operations more effectively by adding three to five day service runs into and out of the named HVXP operations. This change will position freight to improve service in approximately 2,249 lanes by reduction in transit times of up to three days. As a result our service improvement will allow us to further penetrate these lanes, with equal or better service than our competitors.

This change will also add additional terminals to our HVXP network which will improve our penetration in the next day and second day markets, particularly where we don't currently offer the service. In doing so, additional UE positions will be created for our employees to bid and enjoy the benefits of that provision of our contract.

Our technology is such that we will alter daily load plans dynamically based on circumstances at hand, allowing us to move shipments through our improved network to leverage all of our resources; DC's, HVXP's, UE's and Road Drivers.

Implementation of this change will involve the following:

Utility Employees at end of the line terminals will move loads as necessary to HVXP's. Upon arrival they will perform duties in accordance with Article 3, Section 7 before returning to their home domicile in the same shift.

Utility Employees based at end of the line terminals will run meet and turn runs with other Utility Employees and upon arrival at their home terminal will perform duties in accordance with Article 3, Section 7.

Utility Employees based at end of the line terminals will run meet and turn runs with road drivers, as well as turns to Distribution Centers. Additionally, they may be required to move HVXP loads to/from end of the line locations as operational needs dictate.

Road drivers will move HVXP to HVXP loads, either through relay, or meet and turn operations.

Dallas HVXP Operation Southern Region

Terminals	Local Union
Dallas	Local 745
Austin	Local 657
Fort Worth	Local 745
Houston	Local 988
Little Rock	Local 878
Oklahoma City	Local 886
San Antonio	Local 657
Sherman	Local 745
Shreveport	Local 568
Texarkana	Local 878
Tyler	Local 745
Waco	Local 745
Wichita Falls	Local 745
Winters	Local 745

Dallas, TX – Local 745

Current Operation:

Dallas, TX is a major distribution center and linehaul domicile servicing the general geographic area and the ABF System. Dallas currently participates in the Shreveport HVXP. Dallas has 133 employees on the local cartage seniority list and 83 road drivers.

Proposed Operation:

Local Cartage/Dock

Upon implementation of the load plan changes and HVXP operation, Dallas will have an increase of 201 transfer shipments per day. This will result in an increase of one (+1) local cartage employee. The majority of the shipments in the increase will be involved in the HVXP operation, which will be handled by Utility Employees from the participating terminals. In addition Dallas will load HVXP to HVXP loads for Phoenix.

Road Operation

Upon implementation of the load plan changes, Dallas will have a decrease of schedules per day due to the HVXP operation which will have an adverse effect of one (-1) less road driver in their current staffing.

The Dallas road operation will move the HVXP loads to Phoenix by relay through El Paso, TX. Dallas will maintain the primary to El Paso.

HVXP Operation

The Dallas HVXP Operation will provide a service link between the surrounding terminals and the Southwest including the LA Basin terminals.

Dallas will load HVXP to HVXP loads to Phoenix as well as other direct points they are currently loading. The loads will move by road relay to Phoenix.

Dallas will operate as an HVXP operation predominantly but not limited to the following terminals:

Austin, TX
Fort Worth, TX
Houston, TX
Oklahoma City, OK
San Antonio, TX
Sherman, TX
Shreveport, LA
Texarkana, AR
Tyler, TX
Waco, TX
Wichita Falls, TX
Winters, TX

Outbound Freight will move from the origin terminals to Dallas with Utility Employees as specified in the change. The Utility Employees will perform duties in accordance with Article 3, Section 7.

Austin, TX – Local 657

Current Operation:

Austin is an end of the line terminal and provides pickup and delivery service for the general geographic area. Austin currently participates in the San Antonio HVXP and runs a Utility Employee on a turn to Dallas. There are 16 local cartage employees on the seniority list.

Proposed Operation:

Upon implementation of the load plan changes, Austin will continue to participate in the San Antonio HVXP and will also participate in the Dallas HVXP operation. The current Dallas turn utility run will be converted to run to the Dallas HVXP.

Fort Worth, TX – Local 745

Current Operation:

Fort Worth is an end of the line terminal and provides pickup and delivery service for the general geographic area. Fort Worth currently participates in the Shreveport and San Antonio HVXP's and runs a UE on a meet and turn with Little Rock. There are 23 local cartage employees on the seniority list.

Proposed Operation:

Upon implementation of the load plan changes, Fort Worth will also participate in the Dallas HVXP operation. As a result, Fort Worth will gain one (+1) Utility Employee.

Houston, TX – Local 988

Current Operation:

Houston is an end of the line terminal and provides pickup and delivery service for the general geographic area. Houston participates in the Shreveport, San Antonio and Lafayette HVXP operations. They also run a Utility Employee on a Dallas turn and a second Utility Employee on a meet and turn with Little Rock. There are 72 local cartage employees on the seniority list.

Proposed Operation:

Upon implementation of the load plan changes, Houston will also participate in the Dallas HVXP operation. The Dallas turn utility run will be converted to run to the Dallas HVXP. In addition, Houston will gain one (+1) Utility Employee.

Little Rock, AR – Local 878

Current Operation:

Little Rock is a major distribution center, HVXP and linehaul domicile servicing the general geographic area and the ABF System with 101 employees on the local cartage seniority list and 157 road drivers.

Proposed Operation:

Local Cartage/Dock

Upon implementation of the load plan changes, Little Rock will have a decrease of approximately 113 transfer shipments per day which will have an adverse effect of four (-4) less DC employees in their current staffing.

Road Operation

Upon implementation of the load plan changes, Little Rock will have a decrease of linehaul schedules per day which will have an adverse effect of three (-3) less road drivers in their current staffing.

Oklahoma City, OK – Local 886

Current Operation:

Oklahoma City is an end of the line terminal and provides pickup and delivery service for the general geographic area. Oklahoma City currently has two Utility Employees. The Utility Employees run a Dallas turn and a Little Rock meet and turn run five nights a week. There are 21 local cartage employees on the seniority list.

Proposed Operation:

Upon implementation of the load plan changes, Oklahoma City will continue to run a Utility Employee on the Little Rock meet and turn and will now participate in the Dallas HVXP operation. The Dallas turn utility run will be converted to run to the Dallas HVXP.

San Antonio, TX – Local 657

Current Operation:

San Antonio is an end of the line terminal and provides pickup and delivery service for the general geographic area. San Antonio also has an off-site HVXP operation. San Antonio currently participates in the San Antonio HVXP. There are 25 local cartage employees on the seniority list.

Proposed Operation:

Upon implementation of the load plan changes, San Antonio will also participate in the Dallas HVXP operation. As a result, San Antonio will gain one (+1) Utility Employee.

Sherman, TX – Local 745

Current Operation:

Sherman is an end of the line terminal and provides pickup and delivery service for the general geographic area. Sherman currently participates in the Shreveport HVXP. There are 7 local cartage employees on the seniority list.

Proposed Operation:

Upon implementation of the load plan changes, Sherman will also participate in the Dallas HVXP operation. As a result, Sherman will gain one (+1) Utility Employee

Shreveport, LA – Local 568

Current Operation:

Shreveport is an end of the line terminal and HVXP location and provides pickup and delivery service for the general geographic area. Shreveport currently participates in the Little Rock HVXP. There are 7 local cartage employees on the seniority list.

Proposed Operation:

Upon implementation of the load plan changes, Shreveport will participate in the Dallas HVXP operation. As a result, Shreveport will gain one (+1) Utility Employee.

Texarkana, AR – Local 878

Current Operation:

Texarkana is an end of the line terminal and provides pickup and delivery service for the general geographic area. There are 2 local cartage employees on the seniority list.

Proposed Operation:

Upon implementation of the load plan changes, Texarkana will participate in the Dallas HVXP operation. As a result, Texarkana will gain one (+1) Utility Employee

Tyler, TX – Local 745

Current Operation:

Tyler is an end of the line terminal and provides pickup and delivery service for the general geographic area. Tyler currently participates in the Shreveport HVXP and runs a Utility Employee on a turn to Dallas. There are 11 local cartage employees on the seniority list.

Proposed Operation:

Upon implementation of the load plan changes, Tyler will continue to participate in the Shreveport HVXP operation and will also participate in the Dallas HVXP operation. The Dallas turn utility run will be converted to run to the Dallas HVXP.

revised

Tyler, TX – Local 745

Current Operation:

Tyler is an end of the line terminal and provides pickup and delivery service for the general geographic area. Tyler currently participates in the Shreveport HVXP and runs a Utility Employee on a turn to Dallas. There are 11 local cartage employees on the seniority list.

Proposed Operation:

Upon implementation of the load plan changes, Waco will continue to participate in the Shreveport HVXP operation and will also participate in the Dallas HVXP operation. The Dallas turn utility run will be converted to run to the Dallas HVXP.

Waco, TX – Local 745

Current Operation:

Waco is an end of the line terminal and provides pickup and delivery service for the general geographic area. Waco currently participates in the Shreveport and San Antonio HVXP's and runs a Utility Employee on a double turn to Dallas. There are 10 local cartage employees on the seniority list.

Proposed Operation:

Upon implementation of the load plan changes, Waco will continue to participate in the Shreveport and San Antonio HVXP operations and will also participate in the Dallas HVXP operation. The double turn Dallas utility run will be converted to run to the Dallas HVXP.

Wichita Falls, TX – Local 745

Current Operation:

Wichita Falls is an end of the line terminal and provides pickup and delivery service for the general geographic area. Waco currently runs a Utility Employee on a turn to Dallas. There are 3 local cartage employees on the seniority list.

Proposed Operation:

Upon implementation of the load plan changes, Wichita Falls will participate in the Dallas HVXP operation. The Dallas turn utility run will be converted to run to the Dallas HVXP.

Winters, TX – Local 745

Current Operation:

Winters is an end of the line terminal and provides pickup and delivery service for the general geographic area. There are 2 local cartage employees on the seniority list.

Proposed Operation:

Upon implementation of the load plan changes, Winters will participate in the Dallas HVXP operation. As a result, Winters will gain one (+1) Utility Employee.

Dallas HVXP – Southern Region

As a result of this modified HVXP Operation, the transfer opportunities are as follow:

Terminals

Denver

Cheyenne

Colorado Springs

Fort Collins

Local Union

Locals 17 & 455

Local 17

Local 17

Local 17

Denver, CO – Locals 17 & 455

Current Operation:

Denver is an end of the line terminal and linehaul domicile servicing the general geographic area and the ABF System with 50 employees on the local cartage seniority list and 11 road drivers.

Proposed Operation:

Local Cartage/Dock – Local 17

Upon implementation of the load plan changes, Denver will become an HVXP operation providing 1 and 2 day service to the surrounding terminals as well as HVXP to HVXP service to Phoenix. Utility Employees from Fort Collins, Colorado Springs and Cheyenne, WY will participate in the HVXP. This will result in an increase of 63 bills per day primarily in the HVXP operation. The HVXP operation will have an adverse effect of two (-2) less local cartage employees on the local cartage seniority list. Denver will load direct to the Phoenix HVXP.

Road Operation – Local 455

Upon implementation of the load plan changes, Denver will have a decrease in schedules due to the HVXP operation which will have an adverse effect of one (-1) less road driver in their current staffing. Denver will relay the Phoenix HVXP loads through the current road operation.

Denver HVXP Operation

The Denver HVXP Operation will provide a service link between Denver, the Southwest and the LA Basin terminals.

Denver will operate as an HVXP operation predominantly, but not limited to the following terminals:

Billings, MT
Colorado Springs, CO
Cheyenne, WY

Revised

Fort Collins, CO

The HVXP loads will move from origin to Denver with Utility Employees from the origin terminals with the exception of Billings, which will move by Denver road drivers primarily. The Utility Employees will perform duties in accordance with Article 3, Section 7.

Revised

Denver, CO – Locals 17 & 455

Current Operation:

Denver is an end of the line terminal and linehaul domicile servicing the general geographic area and the ABF System with 48 employees on the local cartage seniority list and 11 road drivers.

Proposed Operation:

Local Cartage/Dock – Local 17

Upon implementation of the load plan changes, Denver will become an HVXP operation providing 1 and 2 day service to the surrounding terminals as well as EOL to HVXP service to Phoenix. Utility Employees from Fort Collins, Colorado Springs and Cheyenne, WY will participate in the HVXP. This will result in an increase of 63 bills per day primarily in the HVXP operation. The HVXP operation will have an adverse effect of two (-2) less local cartage employees on the local cartage seniority list. Denver will load direct to the Phoenix HVXP.

Road Operation – Local 455

Upon implementation of the load plan changes, Denver will have a decrease in schedules due to the HVXP operation which will have an adverse effect of one (-1) less road driver in their current staffing. Denver will relay the Phoenix HVXP loads through the current road operation.

Denver HVXP Operation

The Denver HVXP Operation will provide a service link between Denver, the Southwest and the LA Basin terminals.

~~Denver will load HVXP to HVXP loads to Phoenix. The loads will move from Denver with Denver road drivers primarily to Green River, UT. The loads will move from Green River to Phoenix with Albuquerque drivers primarily, with the Albuquerque drivers returning to their home domicile from Phoenix.~~

Denver will operate as an HVXP operation predominantly, but not limited to the following terminals:

Billings, MT

Colorado Springs, CO

Cheyenne, WY

Fort Collins, CO

The HVXP loads will move from origin to Denver with Utility Employees from the origin terminals with the exception of Billings, which will move by Denver road drivers primarily. The Utility Employees will perform duties in accordance with Article 3, Section 7.

Cheyenne, WY – Local 17

Current Operation:

Cheyenne is an end of the line terminal and linehaul domicile providing pickup and delivery service for the general geographic area. Cheyenne does not participate in any current HVXP operation. There are 2 local cartage employees and 29 road drivers on the seniority lists.

Proposed Operation:

Local Cartage

Upon implementation of the load plan changes, Cheyenne will participate in the Denver HVXP operation. As a result, Cheyenne will gain one (+1) Utility Employee.

Road Operation

This change has no effect on the road operation.

Colorado Springs, CO – Local 17

Current Operation:

Colorado Springs is an end of the line terminal providing pickup and delivery service for the general geographic area. Colorado Springs does not participate in any current HVXP operation. There are 7 local cartage employees on the seniority list.

Proposed Operation:

Upon implementation of the load plan changes, Colorado Springs will participate in the Denver HVXP operation. As a result, Colorado Springs will gain one (+1) Utility Employee.

Fort Collins, CO – Local 17

Current Operation:

Fort Collins is an end of the line terminal providing pickup and delivery service for the general geographic area. Fort Collins does not participate in any current HVXP operation. There are 5 local cartage employees on the seniority list.

Proposed Operation:

Upon implementation of the load plan changes, Fort Collins will participate in the Denver HVXP operation. As a result, Fort Collins will gain one (+1) Utility Employee.

Denver HVXP – Western Region

As a result of this modified HVXP Operation, the transfer opportunities are as follow:

Phoenix, AZ – Local 104

Current Operation:

Phoenix is an end of the line terminal with a road domicile. The terminal provides pickup and delivery service for the general geographic area. The Road operation is primary to San Bernardino and supplements the system operation. There are 50 local cartage employees and 11 road drivers on the seniority list.

Proposed Operation:

Local Cartage

Upon implementation of the load plan changes, Phoenix will become an HVXP operation providing 1 and 2 day service to the surrounding terminals as well as the LA Basin operation, Denver, CO and Las Vegas, NV. Phoenix will also perform HVXP service for the three to five day lanes, handling HVXP to HVXP loads from the system. With the addition of the HVXP loads Phoenix will become a seven day operation as an Intermediate Transfer Terminal (ITT).

Phoenix will run Utility Employees on meet and turns with corresponding Utility Employees from the LA Basin operation, with those employees performing hostling and dock work either prior to or at the end of their meet and turn runs as provided in Article 3, Section 7. Phoenix will gain 158 transfer shipments per day.

Phoenix will gain eight (+8) Utility Employee positions upon implementation.

Road Operation

Upon implementation of the load plan changes, Phoenix will see a reduction in the San Bernardino lane and will have an adverse effect of six (-6) road drivers in their current staffing. Phoenix will run meet and turn runs with El Paso to move the HVXP loads from Dallas.

Phoenix HVXP Operation

The Phoenix HVXP Operation will provide a service link between Dallas, the Southwest and the LA Basin terminals. Phoenix will be a 7 day a week operation, with an HVXP as well as an Intermediate Transfer Terminal.

Phoenix, AZ – Local 104

Current Operation:

Phoenix is an end of the line terminal with a road domicile. The terminal provides pickup and delivery service for the general geographic area. The Road operation is primary to San Bernardino and supplements the system operation. There are 48 local cartage employees and 11 road drivers on the seniority list.

Proposed Operation:

Local Cartage

Upon implementation of the load plan changes, Phoenix will become an HVXP operation providing 1 and 2 day service to the surrounding terminals as well as the LA Basin operation, Denver, CO and Las Vegas, NV. Phoenix will also perform HVXP service for the three to five day lanes, handling HVXP to HVXP loads from the system. With the addition of the HVXP loads Phoenix will become a seven day operation as an Intermediate Transfer Terminal (ITT).

Phoenix will run Utility Employees on meet and turns with corresponding Utility Employees from the LA Basin operation, with those employees performing hostling and dock work either prior to or at the end of their meet and turn runs as provided in Article 3, Section 7. Phoenix will gain 158 transfer shipments per day.

Phoenix will gain eight (+8) Utility Employee positions upon implementation.

Road Operation

Upon implementation of the load plan changes, Phoenix will see a reduction in the San Bernardino lane and will have an adverse effect of six (-6) road drivers in their current staffing. Phoenix will run meet and turn runs with El Paso to move the HVXP loads from Dallas.

Phoenix HVXP Operation

The Phoenix HVXP Operation will provide a service link between Dallas, the Southwest and the LA Basin terminals. Phoenix will be a 7 day a week operation, with an HVXP as well as an Intermediate Transfer Terminal.

Dallas will load DC to HVXP as well as HVXP to HVXP loads to Phoenix. The loads will move from Dallas to El Paso primarily with Dallas road drivers. From El Paso the loads will move to Phoenix with El Paso road drivers in a primarily meet and turn operation with Phoenix road drivers.

Denver will load HVXP to HVXP loads to Phoenix. The loads will move from Denver through the existing road operation.

Phoenix will operate as an HVXP operation predominantly, but not limited to the following terminals:

Anaheim
Las Vegas
Long Beach
Pico Rivera
San Bernardino
San Diego
San Fernando
Tucson

The HVXP loads will move from origin to Phoenix with Utility Employees from the origin terminals. The LA Basin terminals and Las Vegas will perform a meet and turn with Phoenix Utility Employees. The Tucson Utility Employee will run to Phoenix and work the HVXP operation on the dock. The Phoenix Utility Employees will work the HVXP operation prior to or after their meet and turns in accordance with Article 3, Section 7.

Phoenix, AZ – Local 104

Current Operation:

Phoenix is an end of the line terminal with a road domicile. The terminal provides pickup and delivery service for the general geographic area. The Road operation is primary to San Bernardino and supplements the system operation. There are 48 local cartage employees and 11 road drivers on the seniority list.

New

Need accurate seniority roster.

Proposed Operation:

Local Cartage

Upon implementation of the load plan changes, Phoenix will become an HVXP operation providing 1 and 2 day service to the surrounding terminals as well as the LA Basin operation, Denver, CO and Las Vegas, NV. Phoenix will also perform HVXP service for the three to five day lanes, handling HVXP to HVXP loads from the system. With the addition of the HVXP loads Phoenix will become a seven day operation as an Intermediate Transfer Terminal (ITT).

Phoenix will run Utility Employees on meet and turns with corresponding Utility Employees from the LA Basin operation, with those employees performing hostling and dock work either prior to or at the end of their meet and turn runs as provided in Article 3, Section 7. Upon implementation of the load plan changes, Phoenix will see a reduction in the San Bernardino lane and will have an adverse effect of six (-6) road drivers in their current staffing. Phoenix will run meet and turn runs with El Paso to move the HVXP loads from Dallas.

Phoenix HVXP Operation

The Phoenix HVXP Operation will provide a service link between Dallas, the Southwest and the LA Basin terminals. Phoenix will be a 7 day a week operation, with an HVXP as well as an Intermediate Transfer Terminal.

Dallas will load DC to HVXP as well as HVXP to HVXP loads to Phoenix. The loads will move from Dallas to El Paso primarily with Dallas road drivers. From El Paso the loads will move to Phoenix with El Paso road drivers in a primarily meet and turn operation with Phoenix road drivers.

Denver will load HVXP to HVXP loads to Phoenix. The loads will move from Denver through the existing road operation.

Phoenix will operate as an HVXP operation predominantly, but not limited to the following terminals:

Anaheim
Las Vegas
Long Beach
Pico Rivera
San Bernardino
San Diego
San Fernando
Tucson

The HVXP loads will move from origin to Phoenix with Utility Employees from the origin terminals. The LA Basin terminals and Las Vegas will perform a meet and turn with Phoenix Utility Employees. The Tucson Utility Employee will run to Phoenix and work the HVXP operation on the dock. The Phoenix Utility Employees will work the HVXP operation prior to or after their meet and turns in accordance with Article 3, Section 7.

Dallas will load DC to HVXP as well as HVXP to HVXP loads to Phoenix. The loads will move from Dallas to El Paso primarily with Dallas road drivers. From El Paso the loads will move to Phoenix with El Paso road drivers in a primarily meet and turn operation with Phoenix road drivers.

Denver will load HVXP to HVXP loads to Phoenix. The loads will move from Denver with ~~Denver road drivers, primarily relaying at Green River, UT with Albuquerque drivers taking the loads to Phoenix.~~

Phoenix will operate as an HVXP operation predominantly, but not limited to the following terminals:

- Anaheim
- Las Vegas
- Long Beach
- Pico Rivera
- San Bernardino
- San Diego
- San Fernando
- Tucson

The HVXP loads will move from origin to Phoenix with Utility Employees from the origin terminals. The LA Basin terminals and Las Vegas will perform a meet and turn with Phoenix Utility Employees. The Tucson Utility Employee will run to Phoenix and work the HVXP operation on the dock. The Phoenix Utility Employees will work the HVXP operation prior to or after their meet and turns in accordance with Article 3, Section 7.

Albuquerque, NM – Local 492

Current Operation:

Albuquerque is a distribution center and linehaul domicile servicing the general geographic area and the ABF System with 62 employees on the local cartage seniority list and 139 road drivers.

Proposed Operation:

Local Cartage/Dock

Upon implementation of the load plan changes, Albuquerque will have a decrease 217 transfer shipments per day which will have an adverse effect of six (-6) less local cartage employees.

Anaheim, CA – Local 952

Current Operation:

Anaheim is an end of the line terminal providing pickup and delivery service for the general geographic area. Anaheim participates in the San Bernardino and Kettleman City HVXP operations. There are 34 local cartage employees on the seniority list.

Proposed Operation:

Upon implementation of the load plan changes, Anaheim will also participate in the Phoenix HVXP operation. As a result, Anaheim will gain one (+1) Utility Employee.

Kingman, AZ – Local 104

Current Operation:

Kingman is an end of the line terminal and linehaul domicile servicing the general geographic area and the ABF System with 1 employee on the local cartage seniority list and 58 road drivers.

Proposed Operation:

Local Cartage/Dock

This change does not affect the local cartage operation in Kingman

Road Operation

Upon implementation of the load plan changes, Kingman will have a decrease in schedules which will have an adverse effect of two (-2) less road drivers in their current staffing.

Las Vegas, NV – Local 631

Current Operation:

Las Vegas is an end of the line terminal providing pickup and delivery service for the general geographic area. Las Vegas participates in the San Bernardino HVXP operation. There are 24 local cartage employees on the seniority list.

Proposed Operation:

Upon implementation of the load plan changes, Las Vegas will also participate in the Phoenix HVXP operation. As a result, Las Vegas will gain one (+1) Utility Employee.

Long Beach, CA – Local 848

Current Operation:

Long Beach is an end of the line terminal providing pickup and delivery service for the general geographic area. Long Beach participates in the San Bernardino and Kettleman City HVXP operations. There are 44 local cartage employees on the seniority list.

Proposed Operation:

Upon implementation of the load plan changes, Long Beach will also participate in the Phoenix HVXP operation. As a result, Long Beach will gain one (+1) Utility Employee.

Pico Rivera, CA – Local 63

Current Operation:

Pico Rivera is an end of the line terminal providing pickup and delivery service for the general geographic area. Pico Rivera participates in the San Bernardino and Kettleman City HVXP operations. There are 41 local cartage employees on the seniority list.

Proposed Operation:

Upon implementation of the load plan changes, Pico Rivera will also participate in the Phoenix HVXP operation. As a result, Pico Rivera will gain one (+1) Utility Employee.

San Bernardino, CA – Local 63

Current Operation:

San Bernardino is a distribution center, HVXP and linehaul domicile servicing the general geographic area and the ABF System with 100 employees on the local cartage seniority list and 28 road drivers.

Proposed Operation:

Local Cartage/Dock

Upon implementation of the load plan changes, San Bernardino will have a decrease 66 transfer shipments per day which will have an adverse effect of three (-3) less local cartage employees. In addition due to HVXP routing changes San Bernardino will have an increase of two (+2) Utility Employees. This is a net adverse effect of one (-1) less employee on the local cartage seniority list.

Road Operation

The change does not negatively affect the road operation at San Bernardino.

San Diego, CA – Local 542

Current Operation:

San Diego is an end of the line terminal providing pickup and delivery service for the general geographic area. San Diego participates in the San Bernardino HVXP operation. There are 28 local cartage employees on the seniority list.

Proposed Operation:

Upon implementation of the load plan changes, San Diego will also participate in the Phoenix HVXP operation. As a result, San Diego will gain one (+1) Utility Employee.

San Fernando, CA – Local 63

Current Operation:

San Fernando is an end of the line terminal providing pickup and delivery service for the general geographic area. Long Beach participates in the San Bernardino and Kettleman City HVXP operations. There are 20 local cartage employees on the seniority list.

Proposed Operation:

Upon implementation of the load plan changes, San Fernando will also participate in the Phoenix HVXP operation. As a result, San Fernando will gain one (+1) Utility Employee.

Tucson, AZ – Local 104

Current Operation:

Tucson is an end of the line terminal and provides pickup and delivery service for the general geographic area. There are 11 local cartage employees on the seniority list.

Proposed Operation:

Upon implementation of the load plan changes, Tucson will participate in the Phoenix HVXP operation. As a result, Tucson will gain one (+1) Utility Employee.

Phoenix HVXP – Western Region

As a result of this modified HVXP Operation, the transfer opportunities are as follow:

Gaining Local Cartage - UE Positions

Term	Num	Code	Local	Change

Seattle HVXP Operation Western Region

Terminals

Seattle

Mount Vernon

Portland

Tacoma

Local Union

Local 174

Local 231

Local 81

Local 313

Seattle, WA – Local 174

Current Operation:

Seattle is an end of the line terminal and linehaul domicile servicing the general geographic area with 31 employees on the local cartage seniority list. Seattle currently participates in the Portland HVXP.

Proposed Operation:

Local Cartage/Dock

Upon implementation of the load plan changes, Seattle will become an HVXP operation providing 1 and 2 day service to the surrounding terminals as well as HVXP to HVXP service to San Bernardino, CA. Utility Employees from Mt. Vernon, WA, Portland, OR and Tacoma, WA will participate in the HVXP. In addition Vancouver, BC and Spokane, WA will participate with road drivers moving loads to Seattle. This will result in an increase of 123 bills per day in the HVXP operation. There will be no effect on the Seattle Local Cartage seniority list.

Seattle HVXP Operation

The Seattle HVXP Operation will provide a service link between Seattle, the Southwest and the LA Basin terminals.

Seattle will load HVXP to HVXP loads to San Bernardino. The loads will move with Sleeper Teams to San Bernardino.

Seattle will operate as an HVXP operation predominantly, but not limited to the following terminals:

Mount Vernon, WA
Portland, OR
Spokane, WA
Portland, OR
Vancouver, BC

The HVXP loads will move from origin to Seattle with Utility Employees from the origin terminals with the exception of Vancouver and Spokane, which will move by road drivers to Seattle. The Utility Employees will perform duties in accordance with Article 3, Section 7.

Mount Vernon, WA – Local 231

Current Operation:

Mount Vernon is an end of the line terminal and provides pickup and delivery service for the general geographic area. Mount Vernon currently participates in the Portland HVXP. There are 8 local cartage employees on the seniority list.

Proposed Operation:

Upon implementation of the load plan changes, Mount Vernon will also participate in the Seattle HVXP operation. As a result, Mount Vernon will gain one (+1) Utility Employee.

Portland, OR – Local 81

Current Operation:

Portland is an end of the line terminal, HVXP and linehaul domicile servicing the general geographic area with 39 employees on the local cartage seniority list. In addition Portland has a road board of 17 employees, including a sleeper operation that runs to San Bernardino, CA. The Portland road operation handles movement between Portland and the Puget Sound area terminals.

Proposed Operation:

Local Cartage

Upon implementation of the load plan changes, Portland will continue as an HVXP, but will see a reduction of 36 transfer Bills per day. This will have an adverse effect on the Portland local cartage list of one (-1) employees. However, Portland will also participate in the Seattle HVXP, which will add one (+1) Utility Employee. The net effect on the local cartage list will be a change of zero (0).

Road

Upon implementation of the load plan changes, Portland will have a reduction in schedules due to the Seattle HVXP operation and will have an adverse effect of the loss of two (-2) road positions.

Tacoma, WA – Local 313

Current Operation:

Tacoma is an end of the line terminal and provides pickup and delivery service for the general geographic area. Tacoma currently participates in the Portland HVXP. There are 20 local cartage employees on the seniority list.

Proposed Operation:

Upon implementation of the load plan changes, Tacoma will also participate in the Seattle HVXP operation. As a result, Tacoma will gain one (+1) Utility Employee.

Distribution/HVXP/Linehaul Centers General Current Operation

Distribution-HVXP-Linehaul Centers involved in this portion of the change are located in:

Central Region

Local	Terminal
41	Kansas City, MO
120	Minneapolis, MN
710	South Chicago, IL
957	Dayton, OH

Southern Region

Local	Terminal
385	Oriando, FL
480	Nashville, TN

Each of these facilities has linehaul domiciles and corresponding operations that run in support of end of the line (EOL) terminal operations or the linehaul system. The methods used to service the EOL terminals and system involved lay down runs, turn runs, VIA's, warm up or cool downs. The mode of operation accomplishes bringing inbound to the EOL terminals and moving their outbound back the DC's, relay points or to the destination.

Through past change of operations we have modified our method of moving loads between EOL's and DC's. Those modifications have included using Utility Employees to run turns to DC's as well as meet and turn runs with linehaul drivers.

End of the Line Terminals General Current Operations

Central Region

Local Union	Terminal
40	Mansfield, OH
89	Bowling Green, KY
346	Duluth, MN
580	Lansing, MI
554	Lincoln, NE
554	Omaha, NE
614	Auburn Hills, MI
688	Quincy, IL

Southern Region

Local Union	Terminal
79	Fort Myers, FL
373	Fayetteville, AR

The above listed terminals are local cartage pickup and delivery operations. These facilities generate freight on a daily basis for a number of different DC's and HVXP operations and the load plan they follow may vary nightly based on the freight that is generated on that day.

General Proposed Operation

Many of the EOL terminal locations serviced by the identified DC's have the same characteristics in that they are prone to large shifts in business levels and have balance problems that create empty miles. In addition, based on their location and distance from the servicing DC's timely response to daily changes in business levels is extremely difficult.

The premise of this portion of the Change of Operations is to deal with movement of freight to and from the EOL's, DC's and HVXP operations. The proposal is to utilize Utility Employees to either run turns to the servicing DC's; meet and turn's with a line driver at an immediate location; or run directly to an HVXP and perform the required dock and hostling work. The proposed operation for each location will be detailed in the following pages.

The following pages will deal with the transfer opportunities that will become available with the approval of this change of operations.

Each section is listed by affected location showing the end of the line locations and the proposed work that will be performed once the change is implemented.

Where the column heading shows "Meet and Turn UE" it is the intent to have bid Utility Employees established by this change run meet turns with a linehaul driver from the applicable DC, irrespective of the exhaustion of the road board. The UE could run the meet and turn any number of nights per week as freight dictates and supplement their home domicile local operation.

Where the column heading shows "Turn Runs UE" it is the intent to have a bid UE run a turn around to the applicable DC on an as needed basis, irrespective of the exhaustion of the DC road board. This will greatly enhance timing and operational efficiency.

Where the column heading shows "HVXP UE" it is the intent to have a bid Utility Employee run to an HVXP, where they will perform duties in accordance with Article 3 Section 7.

Proposed Operations

Dayton, OH - Local 957

Central Region

Local Union	Terminal	Meet & Turn UE	Turn Run UE	HVXP UE
614	Auburn Hills, MI			2
580	Lansing, MI		1	
40	Mansfield, OH			1

IMPLEMENTATION

The Company is requesting an implementation date on or about July 13, 2014. This change will not alter any dispatch procedures or practices that may currently be established in any domicile unless specifically referenced in this change.

All provisions of Article 3, Section 7 and Article 8, Section 6 will be honored and nothing in this change is intended to violate any portion of the National Master Freight Agreement or its Supplements.

Current past practices in any transferring location will not follow successful bidders to their new locations.

As a result of this change involving multiple terminals and domiciles participating in the newly defined HVXP operations the Company proposes a follow the work concept bid for the work being transferred to the terminals involved in those HVXP operations. However we will comply with the decision of the Committee with regards to the bidding process. The Company proposes to post a transfer bid in each losing location involved listing all transfer opportunities available and will keep the posting available for a period of seven (7) days. Copies of seniority lists will be made available for each of the locations transfer opportunities exist for. Transfer opportunities are summarized on pages 54-55 and are segmented geographically by the gaining HVXP operation.

In addition, the Company proposes a follow the work concept bid for the Utility Employee additions identified on pages 60-61. The Company proposes to post a transfer bid in each losing Linehaul Location involved in this change and will keep the posting available for a period of seven (7) days. Copies of seniority lists will be made available for each of the locations transfer opportunities exist for.

Those Locations are:

The Company proposes the filing date of this change to determine active/layoff status unless otherwise ruled by the committee.

In accordance with Article 3, Section 7, employees electing to transfer in this change must be CDL qualified with all required endorsements.

JUSTIFICATION

ABF's Regional Performance Model has been a key to our survival, and further penetration and expansion in these markets will mean growth and additional jobs going forward.

This change of operations is part of our overall plan to provide service to our customers that meets and in many cases exceeds that of our non-union competition.

We are known for providing "top of the class" services, and we have to ensure that our transit time service matches our reputation for safety and claims prevention.

The implementation of this change as written will provide an opportunity for ABF to increase our market share in a business segment that we have previously been unable to provide competitive service in.

In addition it addresses timing and freight flow issues in other areas that we have identified as impediments to meeting our customer's service requirements.

Our first four PSE/UE change of operations expanded our operations into next day, second day and then three to four day service. This change of operations represents the next step of service improvement and opportunity for job growth.

The tactics represented in this change of operations will potentially reduce transit times up to 3 days in approximately 2,249 lanes of traffic.

The staffing modifications in this change are neutral; reductions in one location result in increased staffing at other geographically close locations. The change as proposed paves the way for growth in a market we have identified as having great potential for increased business.

Seniority Roster for Station 151 - Anaheim, CA
as of 11:16:45 PM on 05/01/2014. (34 employees selected)

Report any discrepancies immediately to APD Human Resources
