

## **Safeway Production Standard 6-10-13**

The Standards were looked at on 6-4-13 by Robby (Teamster Engineer) and he will be back the week of 7-8-13 to 7-12-13 to check times again. Manny (Safeway Engineer) told Robby he is still making changes and adjustments. The candy selection in Produce and milk selection in Perishable have allegedly been fixed by Manny and will be double checked in July by Robby. Robby will still be checking the liquor selection in Variety and double stacked pallets in the reserve locations for Reach Drivers.
